DETAILED ACTION

1. Claim 17 is objected to because of the following informalities: In the second line "without pile-up" is not necessary. Appropriate correction is required.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1, 5-7, 8, 12, 14, 15-17 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6310349. Although the conflicting claims are not identical, they are not patentably distinct from each other because the slightly different digital processing of the signals such as measuring time delay between signals or the use of a FIFO system or the use of the instant invention in a coincidence system is an obvious design choice that one skilled in the art would use to optimize the efficiency of the system.

4. Claims 2-4, 9-11, 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2873

5. The following is a statement of reasons for the indication of allowable subject matter: In the claimed invention the use of a weighted-sum having an instantaneous signal amplified by a time constant is not shown or suggested by the prior art.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Patent 6470285 discloses the use of a FIFO system in a pulse pile-up reduction system.
